DETAILED ACTION

REASONS FOR ALLOWANCE

1. The following is an examiner's statement of reasons for allowance: The prior art discloses a brushless motor having a stator which is wound in parallel by phases and polarities and configured of n multiphases and having each of the winding coils of the stator which are connected with one another to a full H-bridges and connected to a DC power supply, a rotor, a commutation encoder having sensing regions and nonsensing regions and two photo sensors connected to the H-bridges.

However, the prior art fails to show, in combination with the invention that the two photo sensors set to each phase, the two photo sensors being connected to a half H-bridge of each phase, to switch the half H-bridge on and off, wherein the width of each of the sensing regions of the commutator encoder is determined to allow a phases among n phases to be excited constantly, the corresponding photo sensors recognizing the a phases excited, wherein the stator has narrow slots to remove flux cancel phenomenon between every winding slot and to remove peak current between said excited phase and said in excited and the number of phases among the n phases, which will be excited, is determined by the distance between the

sensing regions, the distance between the sensing regions being determined through the following expression, width of sensing regions

$$= (2a \times \text{number of phases to be excited}) / (\text{number of polarities of rotor} \times \text{number of phases of motor}) (\phi),$$

the number of sensing regions in the commutation encoder being determined through the following expression,

number of sensing regions

$$= (\text{number of polarities of rotor}) / 2,$$

the distance between the photo sensors on a sensor plate being determined by the following expression,

distance between photo sensors

$$= 2\pi / (\text{number of polarities of rotor} \times \text{number of phases of motor}) (\phi),$$

among the n phases, a phases being excited but b phases not being excited all the time.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
